

# Bonnie v6.2.2 FHIR Release Notes

Bonnie FHIR version 6.2.2 is being released on Tuesday December 21st, 2021 at 8am ET. Below are the updates to Bonnie for version 6.2.2:

- Incorporate version 2.3.3 of the CQL Execution Engine
- Incorporate an enhancement which will allow Bonnie to handle ELM files that include comments
- Provide support for measures containing the 'is' operator, allowing cases pass or fail appropriately based upon the measure logic.
- Extend the application timeout from 15 to 30 minutes. Users will receive a warning after 25 minutes of inactivity.
